WHY CARBON60

You crave to be a Big Fish in a smaller pond. It's time to work with Carbon60 for end-to-end managed hosting services. Here's why:

IN-DEPTH MANAGED CLOUD HOSTING

Carbon60 is an award-winning managed hosting provider based in Canada. We deliver end-to-end IT infrastructure and application hosting solutions for organizations that cannot afford to be down - ever. We collaborate with you to understand your specific application profile, audience metrics and risk tolerance to build the optimal platform for you. We focus on designing, building and scaling your cloud solution, so you can focus on growing your business.

EXPERIENCED & TRUSTED

We manage clouds for customers spanning an array of verticals including financial services, healthcare, media and public sector. From high-traffic customer-facing web applications to critical back-office systems for enterprise applications, we deliver managed infrastructure solutions with the right balance of governance and agility.

WHITE GLOVE SERVICE, SECOND TO NONE

While the technology behind our solutions is crucial, the key reason that our customers select and stay with Carbon60 is for our high-touch, responsive, customer-first approach. Something we call our **White Glove Service Model**.

Our top priority is to know your business, your team and your applications, so that we can deliver the ideal customer experience for you. We become a true partner to your IT organization, nurturing long-lasting relationships based on responsiveness, security and trust.

Carbon60 is an IDC MarketScape 2016 Major Player...on the rise, and a firm to watch. Its white glove service model has enabled Carbon60 to win business. International Data Corporation (IDC)

Managed Hosting Solutions to Accelerate Your Cloud Journey.

MANAGED HYBRID CLOUD SOLUTIONS

ENTERPRISE CONTENT MANAGEMENT SOLUTIONS

PROFESSIONAL SERVICES & CONSULTING

PROFESSIONAL SERVICES & CONSULTING

The journey to the cloud is not a simple task. Navigating between on-premise, private and public cloud models and securing all the elements effectively takes significant effort and skills to pick the ideal path.

Carbon60 takes a holistic approach to assess your current state and desired future state for your infrastructure combined with your broader technology and business drivers to recommend and implement the ideal solution. Here's how we can help accelerate your transformation:

- Cloud Assessment & Strategy
- Cloud & Data Centre Migration
- Cost Optimization
- Security Threat & Risk Assessment
- Application Maintenance & Optimization
- Custom Application Performance Testing

MANAGED HYBRID CLOUD HOSTING SOLUTIONS

Running your business is a daily challenge already without having to keep up and plan for the latest technologies. Carbon60 takes this headache away as we build solutions for you based on the ideal infrastructure platform suitable for your particular use case and manages it 24x7 backed by comprehensive SLAs and responsiveness.

Carbon60 Private Cloud

Secure, resilient and compliant hosted private clouds built on enterprise-grade compute and storage provides your applications with committed resources for predictable workloads in top-tier Canadian data centres.

Managed Public Cloud

For your variable workloads and applications, Carbon60 applies our disciplined approach to manage your IT environment securely on AWS or Azure in global cloud nodes. We remove the complexity of cloud management and optimize your workloads.

Managed Hybrid Cloud

The ideal approach for many organizations may be a hybrid one that leverages a combination of our private cloud and the public cloud. Carbon60 helps you take a measured approach to weighing the benefits, risks and costs to find the optimal balance.

ENTERPRISE CONTENT MANAGEMENT SOLUTIONS

Carbon60's roots are in designing and managing high-visibility web infrastructure platforms for customers across several verticals.

Enterprises and digital marketing agencies strive to deliver flawless experiences to their audience. We use our performance and security oriented approach and our DevOps team to deliver secure open source CMS hosting platforms like WordPress and Drupal to bring digital experiences to life.

We understand and thrive on the pressure to deliver high-performance web properties that can't afford to go down. This is built into our operations philosophy.
