

# SAAS MANAGED CLOUD

Focus on customer acquisition to scale your business to the next level

Carbon60 provides scalable and secure managed cloud platforms for software companies to build and grow their business. As your dev team churns out innovative features to win new clients, count on Carbon60 as your partner to ensure your SaaS platform is reliable, compliant and ready to take on your new customers.

## WHY CARBON60

### SCALE

Regardless of the stage of your SaaS business, we provide the flexibility to scale up infrastructure in an opex model to control costs.

### MULTI-CLOUD OPTIONS

We can deploy your SaaS platform in Canada or globally, on our cloud, private cloud or AWS/Azure public cloud and guide you on the best approach.

### DEVOPS WHITE-GLOVE SUPPORT

We dig deeper to help uncover root causes to make your app perform better. Our DevOps team helps you automate to free up your time.

### SECURITY FIRST APPROACH

Reputation matters. Our default solutions set a high bar for security. Go further with WAF, DDoS mitigation and scans for a robust posture.

### BESPOKE SOLUTIONS

Not all SaaS companies are created equal. We tailor solutions to meet your customers' demands for monitoring, reporting and security.

### COMPLIANT SOLUTIONS

SOC, HIPPA, PCI, Protected data - we've been through these audits and more and can help you pass them to win private and public sector clients.

## ABOUT CARBON60

Your SaaS business changes at a fast pace and your secret sauce is your application. Managing the various underlying infrastructure elements and staying on top of security takes a different skill set that can be a distraction to your dev team. Carbon60's focus is to build, run, optimize and secure hosting environments to support your software delivery platform and help you deploy faster. Learn how Carbon60 can partner with you to accelerate your growth plans whether you're a startup or ramping up to secure large clients.
